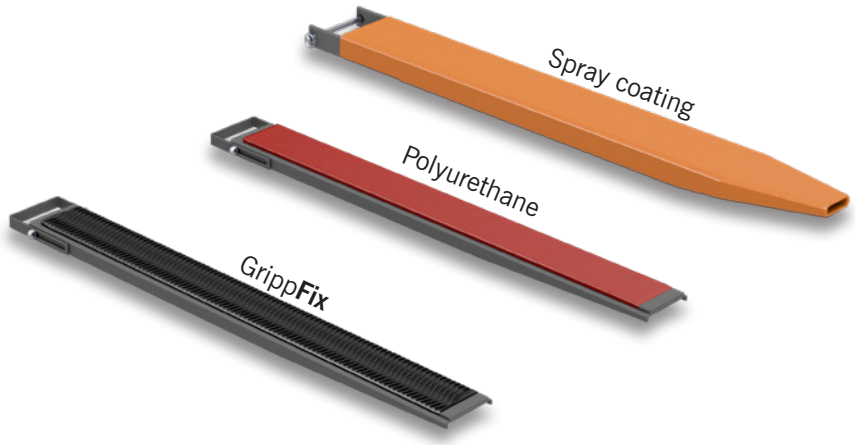
Anti-slip / anti-noise fork shoes and extensions

Slip resistance and load protection



- Easily placed in a few seconds for temporary use
  - Coated Fork**Shoes**: exclusively for subsuquent coating, no change to the load-bearing capacity
  - Coated Fork**Extensions**: Load protection and increase of blade length in one product
- Protection of transported goods
- Slip resistance
- Reduction of damages
- No scratches on goods
- Less vibrations
- Noise reduction, especially when transporting metal parts in residential areas / at night
- Abrasion and cut resistance for long operating life
- Higher safety at work: no risk because of slipping load
- **Spray coating:**
  - All-around coatings of the fork shoes / extensions
  - Very small coating thickness
  - Optional: coloured markings in the coating to specify how deep to enter into the pallet

Which material for which application?
