

## DUPLEX - THE ONLY SPARK RETARDANT FORK WITH WEAR INDICATOR

A real plus in safety and convenience: By using materials of different colors (brass and stainless steel), wear can be immediately determined at a glance.

The inner heel section is always uncladded. This gives the possibility to carry out fork inspection (crack detection) according to ANSI B56.1 / III / 6.

### DUPLEX PRODUCT BENEFITS

- ▶ High safety by visual wear indicator
- ▶ No daily measuring of remaining cladding thickness

*Take your forks immediately out of operation as soon as the inner cladding becomes visible!*

*According to your requirements we offer a blade cladding only or a blade and shank cladding.*
