

# BELUGA fork tip

## Increase safety

### Your benefits

Minimal risk of pricking the cargo

Reduce damage of package and goods

Significantly increased work safety, e.g. when transporting liquid or gaseous substances

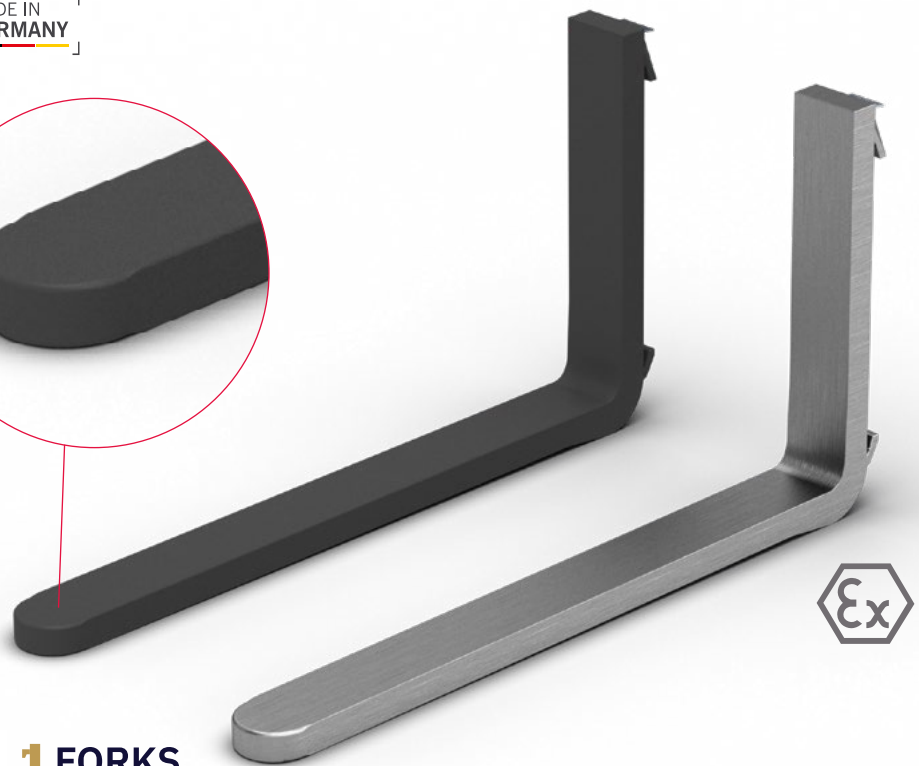

Additional benefit:  
Simple pushing of pallets

### Rounded fork tip

- Fork tip with larger impact surface
- Available in VQ32+ standard material or stainless steel

MADE IN GERMANY

**FORKS**  
since 1964  
VETTER est. 1889

### From the field

**BELUGA** fork with **CROC**<sup>®</sup> fork coating

No pricking of the load

# BELUGA fork tip

## Technical information

### Range of application

Chemical industry

Transport of barrels, bagged goods, containers

Food industry

Forwarding agents / logistics

### Safe on the way in ex-proof areas

- 100 % high-tech stainless steel (including fork hooks)
- Maximum safety: explosion protection is always guaranteed even when the wear limit is reached
- Glass bead blasted, homogeneous surface
- Corrosion resistant
- 100 % ISO 2330-compliant:
  - Tested with triple static safety
  - Continuous vibration test with 1,000,000 load cycles at 25 % overload

#### Note:

The product-specific information of **BELUGA** fork refers to a maximum speed of 3 km/h when handling and manoeuvring goods. A system cannot override the limits of physics and therefore does not release the driver from the duty of care and generally applicable rules.
