

## FOR A SAFE TRANSPORT IN HYGIENE AREAS **PROTECT** STAINLESS STEEL CLADDINGS

In the food or chemical industry, hygiene is of highest priority. Quality **Forks** with stainless steel cladding are essential for this application! Stainless steel claddings offer an easy to clean, acid-resistance surface to meet highest hygiene requirements and guarantee effective protection against dirt and bacteria.

- ▶ Compliance with hygiene requirements
- ▶ Easy to clean
- ▶ Protection against dirt and bacteria
- ▶ Fixed cladding of fork blade / fork back
- ▶ Material: stainless steel (1.4301)
- ▶ No cladding in the inner heel section
  - Easy crack examination
  - Possibility to carry out fork inspection
- ▶ Cladding thickness approx. 4 mm: Total increase of fork section (width and thickness) by approx. 10 mm each
