

# Swan-neck forks

## Safe transport without load carriers

### Your benefits

Protection of the load

Higher level of safety

Fast and smooth loading

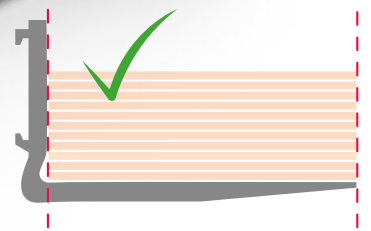

No protruding goods

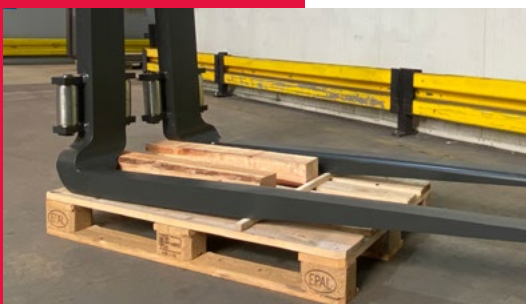

### Inner heel radius of the fork relocated backwards

- No disturbing radius in the fork bend
- Blade length can be completely used
- No additional back stop required (shifting of the load centre of gravity) to bridge the inner radius of the fork bend
- Ideal for panel packs, delicate pallets, etc.

MADE IN GERMANY

### From the field

Cranked forks with inner radius relocated backwards

# Swan-neck forks

## Technical information

### Range of application

Furniture industry

Paper industry

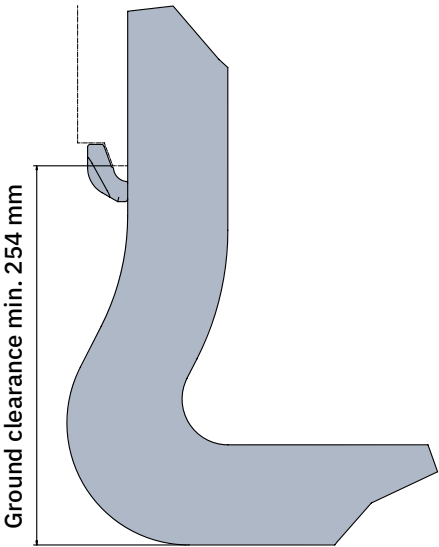

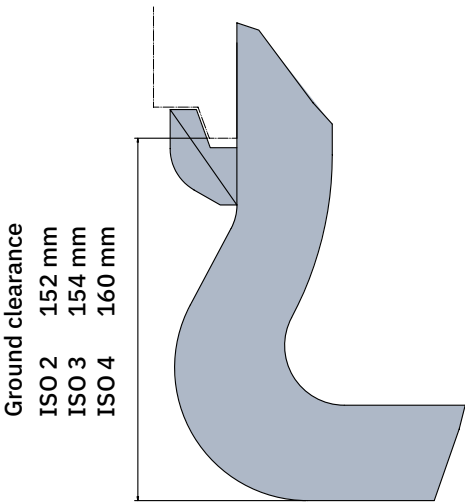

Timber industry

Sheet metal / plate material

### Versions

Optimised load capacity	Optimised ground clearance
High load capacity but also higher ground clearance	Low ground clearance (min. 152 mm) but also lower load capacity
	

### Cross-section

- min. 50 x 50 mm
- max. 200 x 60 mm
